

# The South Fork Trail

## Segment 5: Peachtree Bar (West)

**Report Date:** June 13, 2022.

**Trail Stats** -- Mileage: 2.5 miles; Elevation Gain/Loss: 230 feet. 2,080' (top), 1,850' (bottom).

**Status:** [https://www.google.com/maps/d/viewer?mid=1cK-eXqe6lX6YY26\\_JrNhdLB370vI92aL&ll=37.60174944115586%2C-119.79676961792443&z=12](https://www.google.com/maps/d/viewer?mid=1cK-eXqe6lX6YY26_JrNhdLB370vI92aL&ll=37.60174944115586%2C-119.79676961792443&z=12)

**Overall Goal** -- To repair and maintain the segment for non-motorized users (hikers, runners equestrians and backpackers).

### Project History –

The section of trail between Devil's Gulch and the South Fork of the Merced was scouted in 2014, 2015 and 2017; no work has occurred on this trail segment. Although it is a short section, there are many work details. A cable crossing used to exist across the South Fork, but that was swept away in 2016; the cable crossing at Devil's Gulch exists, but is not used. Bridge-crossings are not planned. The section of trail from the river crossing to Peachtree Bar was scouted in 2014 and 2015, then worked on once (October 29-31, 2019).

---

## Past Activities --

Except where noted, all categories are described as "number of."

YEAR	OUTINGS	VOL-HOURS	TREES CLEARED	TREAD REPAIR (ft)	ROCKWORK	BRUSH REMOVED	CAMPSITE IMPROVE
2014	1	8			survey work		
2015	1	32			survey work		
2019	1	50	6	100'	0	312	0

## Future Objectives –

1. Improve the cable-crossing landing sites at Devil's Gulch
2. Restore the original high-water trail; remove the "river" user-trail.
3. Remove the large thicket of buckbrush from the trail.
4. Locate and flag missing trail segment (4 hours); restore it (40 hours)
5. Widen trail through the talus rock segment (40 hours)
6. Repair trail tread (0.5 miles)
7. Buck fallen trees from trail (approximately 2)
8. Remove brush and saplings encroaching onto trail by: (1) extract buck-brush, poison oak and deer-brush by roots (8 hrs labor); and, (2) clipping back brush (4 hrs labor)
9. Clear dead ladder fuel from trunks of oak trees in the trail corridor (2 trees).
